Commercial off the Shelf Software

NAME	VENDOR	VERSION	DESCRIPTION OF HOW USED
OS390	IBM	2.10	Mainframe operating system and components
SUPRA	CINCOM	2.6.10	Hierarchical database management system from CINCOM; uses DATBAS call to communicate with DBMS in COBOL programs; uses MANTIS language for realtime access
COBOL-85	IBM	N/A	Batch programming language
MANTIS	CINCOM	5.4.01	CINCOM on-line programming language
RACF	IBM	7.0.3	Mainframe security package
SYNCSORT	Syncsort	3.7	Mainframe sort package
FILEAID	Compuware	8.8	Mainframe sequential search and update utility
ABENDAID	Compuware	7.8	Mainframe aid for helping to determine cause of abort
LSMCALL	FileTek	1.7	Call routine that passes data to and from optical subsystem
ENTIRE Security	CINCOM	CSOEMNSC 2.6.10	Verifies user authorization
Report.web (OLRV)	(ASG) Allen Systems Groups	Client portion (Insight) - 2.7.0.72 Server portion - 2.7	Allows users to view MOCAS reports over the WEB.
Rumba	Net Manage	7.0	TCP/IP connectivity to MVS (DFAS)
QWS3270	Jolly Giant Software	3.21	TCP/IP connectivity to MVS (DCMA)
Windows	Microsoft	NT and 2000	Workstation Operating System (DFAS)
Windows	Microsoft	2000	Workstation Operating System (DCMA)

Government Proprietary Tools (GOTS)

NAME	AGENCY	VERSION	DESCRIPTION OF HOW USED
SLAP	DLA	08/2002	Source Librarian and Preprocessor; has macro facility; maintains mainframe source code for check-in/checkout, except MANTIS. Provides version control and code standardization.
MORDS	DLA	08/2002	Report Distribution System. An administrator sets up parameters to determine routing of reports. Allows users to reprint reports.
CELLS	DFAS	UNMZ0531 UNMZ1004	Application which rolls up MORDS CAO level reports into reports by financial cell and recomputes totals at the cell level; parametrically driven
MOCAS SUPRA Interface	DFAS	UNDB05N2 UNDB10N2 UNDB15N2	middleware interface which does calls to DATBAS in lieu of application program calling DATBAS directly
SPIECALL	DLA	08/2002	when turned on by the call, this feature that intercepts "S0C7" abends, modifies operand to zero and re-executes instruction
MOVETHRU	DLA	UTBG8403	add/remove zone masks from numeric fields
YEARWIN	DLA	UTDV1110	call routine to expand date to include century prior to sort
YEARWINX	DLA	UTDV1110	call routine to compress century out of date after sort
PUTID	DLA	08/2002	call routine to get current program identifier info and to denote beginning and ending of application program execution
PCAMAN	DLA	UTBG8003	call routine for switch values and other input parameters
UTHS03	DLA	01	call routine for cycle control record
UTHS04	DLA	03	call routine for MOCAS organizations control record
MANDATE2	DLA	08/2002	call routine for date manipulation
TESS (MANTIS Security Interface)	DLA	26.10	verifies whether or not User Id is authorized to access a program or screen, may optionally identify which functions within a program a user is authorized to perform; logs unauthorized attempts
